## INTRODUCTION

A growing number of medicines are based on biological molecules such as proteins and monoclonal antibodies. These novel drugs have resulted in new, more effective treatments for a number of serious conditions. Yet sometimes these medicines trigger a response from the patient's immune system, which can decrease the effectiveness of the drug or cause severe side effects.

The aim of the IMI-founded ABIRISK project "**Anti-Biopharmaceutical Immunization: Prediction and Analysis of Clinical Reactions to Minimize the Risk**", is to shed new light on the factors behind this immune response. The project, which represents the first concerted effort to solve this problem, officially kicked off March 1st, 2012. ABIRISK project will aid in the creation of new, safer **biopharmaceuticals (BPs)** and also generate tools to determine how individual patients are likely to respond to them both in clinical trials and after release to the market.

The ABIRISK consortium (presently made up of thirty-five partners, twenty-four of which are academic institutions, nine are EFPIA member companies and two are small and medium enterprises, with thirteen countries represented), has been designed to meet all of these requirements in order to target three types of disorders: **Hemophilia A, Multiple sclerosis and Inflammatory diseases: inflammatory rheumatisms (including rheumatoid arthritis) and inflammatory bowel diseases.**

ABIRISK Project will collect data both retrospectively from patients suffering from various types of diseases and treated with various BPs at European centers with a high level of experience in clinical research and will prospectively recruit additional patients in dedicated studies during the 5 years of this program. Guidelines and Standard Operating Protocols for the study of anti-drug immunization will be established and used to standardize the collection of prospective data from these patients.

ABIRISK Project thus represents a unique opportunity to create an interdisciplinary task force of clinical centers especially designed to study immune responses against biopharmaceuticals.

## WELCOME

Dear Reader,

We would like to welcome you to the **January 2016 ABIRISK Scientific Newsletter**. The Scientific Newsletter gives you a monthly update on the most relevant literature related to ABIRISK topics published around the globe, both inside and outside ABIRISK consortium.

From now on, we will draw your attention to a selection of articles each month that we think make a difference in their respective fields.

In addition, you will find in this issue some regulatory news on biopharmaceuticals

We look forward to your visit on **ABIRISK** website for more information and updates on the program.

Enjoy reading !

Best wishes

*The ABIRISK management team*

## LITERATURE

### This month's selected articles

1. A very well thought review on new functions of B cells in autoimmunity especially on secretion of cytokines which can be important for immunization against biologics

[Cytokine-producing B cells: a translational view on their roles in human and mouse autoimmune diseases.](#)

Lino AC, Dörner T, Bar-Or A, Fillatreau S.  
Immunol Rev. 2016 Jan;269(1):130-44

2. In this study, Ternant et al. show that both allotypes of the therapeutic antibody and of the recipients influence the PK of therapeutic antibody because of allotypic variations of binding to FcRn

[IgG1 Allotypes Influence the Pharmacokinetics of Therapeutic Monoclonal Antibodies through FcRn Binding.](#)

Ternant D, Arnoult C, Pugnière M, Dhommée C, Drocourt D, Perouzel E, Passot C, Baroukh N, Mulleman D, Tiraby G, Watier H, Paintaud G, Gouilleux-Gruart V.  
J Immunol. 2015 Dec 18.

3. This work provides some important information on the mechanism of action of Multiple Sclerosis and other demyelinating CNS diseases therapies, another challenge for the autoimmune nature of MS, which could not be proven so far

[Rituximab induces clonal expansion of IgG memory B-cells in patients with inflammatory central nervous system demyelination.](#)

Maurer MA, Tuller F, Gredler V, Berger T, Lutterotti A, Lünemann JD, Reindl M.  
J Neuroimmunol. 2016 Jan 15;290:49-53.

## Immunogenicity

### [Infliximab-induced autoantibodies: a multicenter study.](#)

Vaz JL, Fernandes V, Nogueira F, Arnóbio A, Levy RA.

Clin Rheumatol. 2015 Dec 17.

### [Aggregation risk prediction for antibodies and its application to biotherapeutic development.](#)

Obrezanova O, Arnell A, de la Cuesta RG, Berthelot ME, Gallagher TR, Zurdo J, Stallwood Y.

MAbs. 2015;7(2):352-63.

### [The Role of Aggregates of Therapeutic Protein Products in Immunogenicity: An Evaluation by Mathematical Modeling.](#)

Yin L, Chen X, Tiwari A, Vicini P, Hickling TP.

J Immunol Res. 2015;2015:401956.

### [Small amounts of sub-visible aggregates enhance the immunogenic potential of monoclonal antibody therapeutics.](#)

Ahmadi M, Bryson CJ, Cloake EA, Welch K, Filipe V, Romeijn S, Hawe A, Jiskoot W, Baker MP, Fogg MH.

Pharm Res. 2015 Apr;32(4):1383-94.

## Methods

### [Indirect assessment of neutralizing anti-drug antibodies utilizing pharmacokinetic assay data.](#)

Vettermann C, Ortiz J, Lee S, Sanchez S, Victor HP, Ma M, Heath T, Gupta S.

J Immunol Methods. 2015 Dec 19.

### [Enhanced Detection of Antigen-Specific CD4+ T Cells Using Altered Peptide Flanking Residue Peptide-MHC Class II Multimers.](#)

Holland CJ, Dolton G, Scurr M, Ladell K, Schauenburg AJ, Miners K, Madura F, Sewell AK, Price DA, Cole DK, Godkin AJ.

J Immunol. 2015 Dec 15;195(12):5827-36.

### [Cytokine release assays for the prediction of therapeutic mAb safety in first-in man trials--Whole blood cytokine release assays are poorly predictive for TGN1412 cytokine storm.](#)

Vessillier S, Eastwood D, Fox B, Sathish J, Sethu S, Dougall T, Thorpe SJ, Thorpe R, Stebbings R.

J Immunol Methods. 2015 Sep;424:43-52.

[Agreement in assessment of infliximab and adalimumab levels in rheumatoid arthritis: interlaboratory and interassay comparison.](#)

Valor L, Hernández-Flórez D, de la Torre I, Llinares F, Rosas J, Yagüe J, Garrido J, Naredo E.  
*Clin Exp Rheumatol.* 2015 Sep-Oct;33(5):617-23.

[Comparison of Two Different Techniques to Assess Adalimumab Trough Levels in Patients with Crohn's Disease.](#)

Bodini G, Giannini EG, Furnari M, Marabotto G, Baldissarro I, Del Nero L, Assandri L, Moscatelli A, Savarino V, Savarino E.  
*J Gastrointestin Liver Dis.* 2015 Dec;24(4):451-6.

[Clinical laboratory application of a reporter-gene assay for measurement of functional activity and neutralizing antibody response to infliximab.](#)

Pavlov IY, Carper J, Lázár-Molnár E, Delgado JC.  
*Clin Chim Acta.* 2015 Dec 12;453:147-153.

## Biosimilars

[The Tortoise and the Hare: Evolving Regulatory Landscapes for Biosimilars.](#)

Konara CS, Barnard RT, Hine D, Siegel E, Ferro V.  
*Trends Biotechnol.* 2016 Jan;34(1):70-83.

[Efficacy And Safety Of The Biosimilar Infliximab CT-P13 Treatment In Inflammatory Bowel Diseases: A Prospective, Multicentre, Nationwide Cohort.](#)

Gecse KB, Lovász BD, Farkas K, Banai J, Bene L, Gasztonyi B, Golovics PA, Kristóf T, Lakatos L, Csontos ÁA, Juhász M, Nagy F, Palatka K, Papp M, Patai Á, Lakner L, Salamon Á, Szamosi T, Szepes Z, Tóth GT, Vincze Á, Szalay B, Molnár T, Lakatos PL.  
*J Crohns Colitis.* 2015 Dec 10.

## Animal models

[The Role of Anti-drug Antibodies in the Pharmacokinetics, Disposition, Target Engagement, and Efficacy of a GITR Agonist Monoclonal Antibody in Mice.](#)

Brumm ND, Mauze S, Gu D, Wiswell D, Ueda R, Hodges D, Beebe AM, Zhang S, Escandon E.  
*J Pharmacol Exp Ther.* 2015 Dec 15.

[The immunogenicity of platelet-derived FVIII in hemophilia A mice with or without pre-existing anti-FVIII immunity.](#)
